COSC 4P02: SOFTWARE ENGINEERING 2

Meeting 20: Scrum 11

15 March 2024

ATTENDEES

Tanvir Hasan, Muhammed Bilal, Anjali Sabu, Marium Nur, Amani Anderson, Adbul-Maalik Siddiqui

AGENDA

☑ Review the progress of the team on assigned tasks for Sprint 4
- Anjali has made progress for the dashboard page and will continue working on it.
- Amani fixed the issue of user logged in even after the page was refreshed. Also, faced a bug that the url link would not shorten without http, but managed to resolve it.
- Bilal is working on adding a panel for premium users to access custom features. Created a customizable dropdown menu for premium features. Added required premium features in our Summarizer page.
- Maalik figured out how to merge frontend and backend, and will continue working on it.
- Hamza has completed the user history backend task - adding functionalities to edit, delete and view user history.
- Tanvir worked on extracting text from youtube videos. Using Google, the time required is less for videos that already have captions but has a very slow response time for videos without captions. A much faster response time and better text punctuations is provided by using Amazon. Have decided to use Amazon, will continue working on testing for summarization using the text extracted.
- Marium worked on making the VerifyUser component fully responsive and will continue working on responsiveness for the Reset Password and Reviews component.

☑ Update progress of tasks in Jira

ACTION ITEMS FOR THE NEXT MEETING

☐ Review the progress of the team on Sprint 4 tasks
☐ Update the progress of tasks on Jira as needed
